DETAILED ACTION

This is a first office action on the merits of patent application S. N. 10/822,207.

Drawings

Figures 1, 2a and 2b should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "at least two of its three facial sides other than its magnetic force exerting facial side, namely over at least its rear and outer facial sides".

Art Unit: 3681

The phrase constitutes a range-within-range recitation deeming the scope of the claim unascertainable.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Sakai et al. ('561).

Sakai discloses an electromagnetic coupling comprising a pilot clutch (10d), a main clutch (10c), a retaining ring (15), an electromagnetic coil (13), surrounding ferromagnetic material (11b, 16), a non magnetic material covering (11a). It should be noted that it has been assumed that the armature or retaining ring is inherently made of ferromagnetic material.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-6, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Sakai et al. ('561).

Sakai discloses the claimed invention except for the specifics of the ferromagnetic material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the claimed composition, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US006585093B2, US006578684B2, US006622838B2, US006729455B2 and US006769524B2 disclose other clutch devices having magnetic/non-magnetic components.
